## Anwendung 3: Barplot

ggplot2 und die Daten laden:

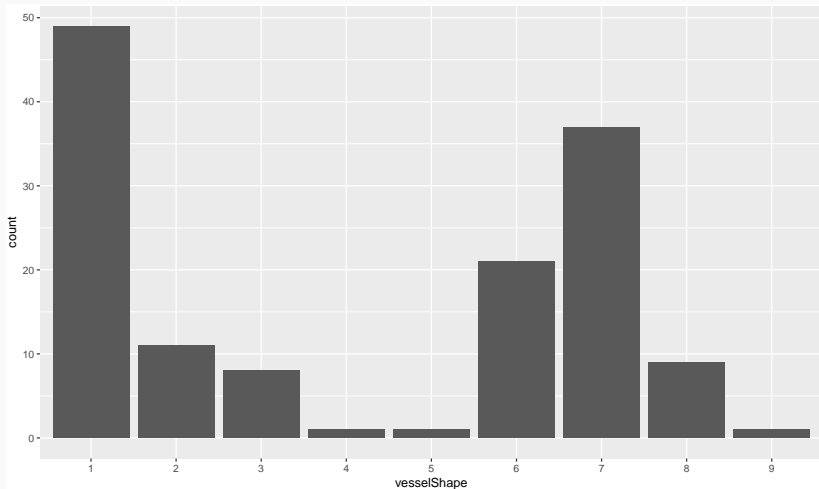

```
library(ggplot2)
```

```
df <- read.csv("../data/AtlantPottery.csv", sep = ',')
```

## Anwendung 3: Barplot

Einfacher Barplot

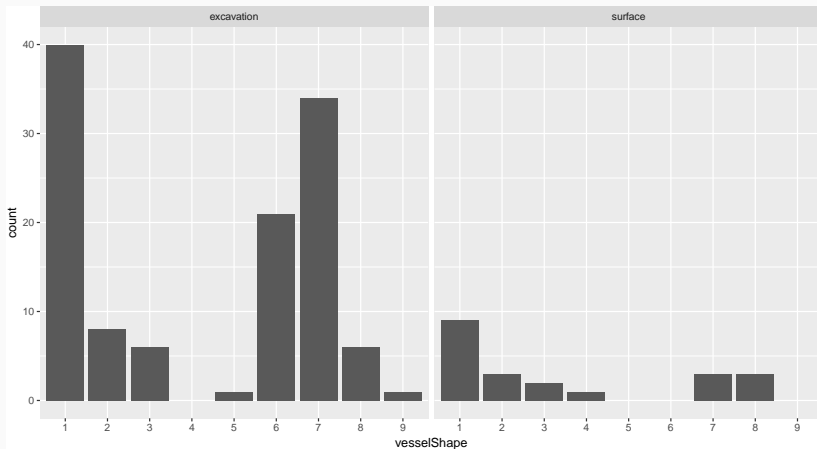

```
ggplot(df, aes(vesselShape)) +  
  geom_bar()
```

## Anwendung 3: Barplot

Facet

```
ggplot(df, aes(vesselShape)) +  
  geom_bar() +  
  facet_wrap(~ feature_simple)
```

## Anwendung 3: Barplot

### Facet-Grid

```
ggplot(df, aes(vesselShape)) +  
  geom_bar() +  
  facet_grid(feature ~ site)
```
